Samuele Ferri

Education

- 2024–now **PhD in Computer science and Mathematics of Computation**, *University of Insubria*, Como
- 2020–2022 **Master degree in mathematics**, *University of Insubria*, Como
Graduation grade: 104/110
- 2022 **Teaching qualification (Italy)**, *University of Insubria*, Como
24 cfu qualification
- 2017–2020 **Bachelor degree in mathematics**, *University of Insubria*, Como
Graduation grade: 93/110
- 2013–2017 **High school diploma**, *Liceo Lugano 1*, Lugano

Publications

Research interests numerical linear algebra, numerical methods for PDEs

- E. C. Braun, G. Bretti, S. Ferri, M. L. Santarelli, M. Semplice. "*Dissolution of carbonate stones caused by CO₂ pollutant: an erosion model*". Arxiv preprint (2026)
- S. Ferri, C. Giraudo, V. Loi, M. Kuchta, S. Serra-Capizzano. "*Spectral analysis of the stiffness matrix sequence in the approximated Stokes equation*". Arxiv preprint (2026)
- N. Barakitis, M. Donatelli, S. Ferri, V. Loi, S. Serra-Capizzano, R. Sormani. "*Blocking structures, approximation, and preconditioning*". Numerical Algorithms Volume 100, pp. 1893–1927 (2025)

Master thesis

- Title *De exoticis 7-sphaeris*
- Supervisor Giovanni Bazzoni
- Description In this paper, we retrace Milnor's studies aimed at finding homeomorphic but not diffeomorphic manifolds on the 7-sphere, through the study of 3-sphere bundles on the 4-sphere and their characteristic classes.

Bachelor thesis

- Title *Mixing time for Glauber dynamics*
- Supervisor Andrea Posilicano
- Description This thesis work is aimed at studying the time required for the Markov chain describing the Glauber dynamics for the Ising model to reach its stationary distribution.
